

Steps involved in confirmatory test

- The confirmatory test will be conducted confidentially. Only the doctor or medical assistant who conducts the test will know your personal particulars.
- You should keep to your appointment (2 weeks after blood sample was taken) with your doctor or medical assistant to obtain the result and counseling.
- If your HIV test is **NEGATIVE**, you will be given an appointment to repeat the test after 6 months.
- If your test is **POSITIVE**, you will be referred to any government health facilities of your choice that provide HIV management services. The follow-up care will comprise of counseling services, medical examination, laboratory testing and treatment.

If you have further enquiries, contact any government health clinics or the state **AIDS** officers.

ANONYMOUS HIV TEST

The test is simple, safe and painless.

The service is free and result will be kept confidential.

Contact any government Health clinics.

AIDS CANNOT BE CURED.....

AIDS is a disease that has no cure. It is caused by Human Immunodeficiency Virus (HIV). The virus damages the human immune system.

The virus can be found in blood, semen and vaginal fluid of an infected person.

YOU MAY BE EXPOSED TO HIV INFECTION IF YOU.....

- Have a sexual partner/spouse (husband/wife) who is infected with HIV.
- Are a sex worker or have patronized a sex worker.
- Or your partner indulges in homosexual relationship.
- Have multiple sex partners.
- Have a partner/spouse who is a drug user.
- Are a drug user and have shared needles.

ARE YOU INFECTED WITH HIV....

The only way to find out - Take the HIV test.

Taking the HIV test can be the first step to save your life and that of your loved ones.

The test is easily available at government health clinics. It is simple, painless, safe and provided free.

HOW TO OBTAIN HIV TEST

Steps involve in screening test

- You can go to any government health clinics.
- You can see the doctor or medical assistant/nurse on duty directly and request for this test.
- Counseling will be given by the doctor or officer on duty.
- A drop of blood will be taken from your finger tip. Result will be available within 15 minutes.
- If the results is '**non reactive**', you shall be given further information and advised to repeat the test after 6 months.
- If the results is '**reactive**', you shall be given due advice and your consent will be obtained to conduct a confirmatory test.
