

WorldTBDay2003

"The best part about being cured is I am happy to be well again with my family and I am able to do what I could not do when I was ill. Also, it proves that TB is really curable."

..Seru Vulaono, mother, Fiji

TB-free

In principle, after a patient is declared TB-free, he or she does not need to come back for a check-up. Every day in the Western Pacific Region, nearly 2000 people walk away from the disease, successfully treated by DOTS.

**"DOTS cured me -
it will cure you too!"**
