

WorldTBDay2003

"I want to tell all patients that TB can be cured as long as they take the right treatment. TB patients should not seek care blindly. They should go to TB institutions for diagnosis with standard treatment and regular drug taking."

..Tan Mei, Farmer, China

Patient advocacy

As the number of cured DOTS patients grows, the team of people fighting TB expands. From helping out with awareness campaigns to volunteering at DOTS centres, cured patients are becoming the best advocates for the Stop TB campaign.

**"DOTS cured me -
it will cure you too!"**
