

CANCER **Early Treatment is a Smart Move**

Know the 9 Warning Signs of Cancer

1. Vaginal bleeding that occurs between menstruation periods or after menopause.

2. Lumps in breasts or any other changes detected in the breasts.

3. Changes in bowel-movement routine.

4. Lumps in the neck that has not previously been there.

5. Hoarse voice for more than two weeks.

6. Abnormal nose-bleeding, loss of hearing or ringing ears.

7. Ulcer that does not heal, lumps or white and red spots on the mouth.

8. Continuous stomach pain or discomfort.

9. Continuous coughing and traces of blood in phlegm.

If you have the above symptoms it does not necessarily mean you have cancer. Seek immediate medical advise for confirmation

EARLY DETECTION OF CANCER CAN SAVE YOUR LIFE
